

**Leopardstown Roundabout Reconfiguration – Leopardstown  
Link Road –  
Identification of Services**

**4<sup>th</sup> September 2013**

In support of the ongoing design work for the Leopardstown Link Road & Roundabout Reconfiguration scheme and ESB Link Road, the Dun Laoghaire Rathdown County Council is planning to undertake a ground investigation slit trench survey at key selected locations to identify and trace underground services and utilities.

We have appointed **Ground Investigations Ireland Limited** as the specialist ground investigation contractor for this work and will advise you further regarding the programme when finalised.

At present we estimate that this work will commence mid September 2013 and be complete within a 2-3 week period. Roughan & O'Donovan Consulting Engineers will undertake the coordination and supervision of this work on behalf on the Council.

**As far as practicable the works will be undertaken between 20:00hrs and 06:00hrs Monday to Friday, except for works on private lands which may be undertaken during daytime hours subject to landowners consent.**

**A Traffic Management Plan will be presented to SBDA shortly.**
